Professional Summary

Full-Stack Mobile Developer and Software Engineer with over 3 years of experience building reliable, scalable apps. Skilled in mobile and backend development, clean coding, and team collaboration. Committed to learning new technologies and delivering user-focused solutions with a strong eye for quality.

Work Experience

Full Stack Developer, Simcoe IT

January 2024 - Current

- Developed scalable backend solutions using Python, Django, and optimized REST APIs, integrating features like video calling and real-time chat for enhanced user interaction.
- Built mobile applications with Flutter and Firebase, handling real-time data and authentication, and published on the Google Play Store to reach a wider audience.
- Managed deployments on Heroku, maintained databases in SQLite and PostgreSQL, and used Git/GitHub for effective version control and collaboration.

Software Engineer, Goprogs Technologies Pvt. Ltd

November 2022 – December 2023

- Proficient in front-end mobile application development, ensuring seamless user interaction experiences through logic building and implementation.
- Expertise in integrating APIs in Flutter apps, enabling efficient communication and data exchange.
- Skilled in building and optimizing cross-platform applications, identifying and resolving bugs to enhance performance and user satisfaction.

Flutter Developer, As-Siraat

September 2022 – January 2023

- Led end-to-end mobile app development process, encompassing UI design, user journey mapping, and front-end implementation using Flutter framework, delivering a seamless and user-friendly application.
- Translated given designs into intuitive and visually appealing user interfaces, ensuring consistent adherence to design guidelines and delivering an exceptional user experience.
- Implemented efficient local database solutions to optimize app performance.

Projects

Developed 15+ mobile applications, 5 websites, and completed 4 Django REST API projects across various domains.
